Sustainability – Working Student

Tasks

We offer you a varied and demanding job in the area of testing, inspection, and certification systems for the sustainability of products over the entire life cycle and applying circular economy principles.

You work both independently and in a team in an innovative, international environment. Your activities include:

1. Qualitative analysis of recycled and bio-based content of products based on company data in different countries and world regions
2. Evaluation and analysis for the creation of benchmark reports
3. Market research and competition observation
4. Takeover of smaller marketing projects

Qualifications

- Studies in the field of sustainability, circular economy
- Excellent analytical skills and ability to make sense of data
- Routine handling of MS Office applications (especially Excel and Power Point)
- Self-starter with a positive outlook and motivated attitude
- Good oral and written communication skills. Proficient in English
